SPRING 2019 | REDS

dear club members,

A few months late, but happy 2019! I hope you had a chance to re-charge your batteries a bit at the end of the year, and have had some success holding on to your New Year's resolutions until now (except if it was drinking less wine- wink, wink). Our team had a busy end to the year with Harvest starting later than usual and extending our time in the vineyard later into the end of the year, but everything is shaping up just perfectly. With just a little break at the holidays, we've since been busy getting some of our 2019 releases ready to share with you!

We are back with releases of member favorites including our 2017 White Burgundy and 2018 Wow Oui. We consider this duo the go-to for spring, once the sun starts to peek out from behind the clouds. We also have the 2016 Tusca Brava, which is a Benziger family favorite, as well as a perpetual award winner.

We hope you are making plans to join us for our great Club events planned this year! Our complimentary Social Club get-togethers for Imagery & Benziger Club Members will continue in 2019. Our 2019 event calendar is out so you can mark the dates and plan to spend some time with us this year!

Cheers to a year filled with great wine and friends!

Vintage Notes

2016: We had become accustomed to working with limited amounts of water due to the drought, but this year we worried about abundance - it was a wet winter. Despite early season warmth and rain challenges, once we hit ripening season we had great weather for the hanging fruit to reach full maturity and to achieve ideal flavors and balance.

2017: During winter and spring we had record-breaking rainfall - 75 inches. After the wet start the vines developed at rapid growth. We endured four heat waves before the berries fully changed color. We did not pull leaves around the fruit as we normally do, keeping the clusters shaded from the intense summer heat. The vintage finished late with overall fruit forward wines with nice acidity. All of our white varieties, and roughly 90% of our red varieties, had been harvested before the October fires.
