WINE CLUB NEWSLETTER

SPRING 2020 | REDS

*dear club members,*

A few months behind, but Happy 2020! We hope your year is off to a great start and you have been able to stick to your New Year's resolution! Our 2019 harvest season was a great success and we are thrilled with the 2019 Vintage. We are also eager to share the Spring Wine Club selections with you!

New decade, new look, same great Imagery wines- Starting with our 2019 white and 2018 red varietals, we are rolling out newly designed labels. We are still featuring the unique artwork that we all love, but with a clean and crisp white background. Additionally, you'll note that the white varietals no longer have a foil capsule. This will allow the artwork to be the main focus and shine (and help you get into the bottle a little quicker)!

We hope you are making plans to join us for our great Wine Club events planned this year! Our complimentary Social Club get togethers will continue in 2020, as well as Gallery Days featuring some of our amazing label artists. Our 2020 event calendar is out so you can save the dates of our wine dinners, French Connection and Italian Affair. We look forward to seeing you.

Cheers to a year filled with great wine and friends!

## vintage notes

**2017:** During winter and spring we had record-breaking rainfall - 75 inches. After the wet start the vines developed at rapid growth. We endured four heat waves before the berries fully changed color. We did not pull leaves around the fruit as we normally do, keeping the clusters shaded from the intense summer heat. The vintage finished late with overall fruit forward wines with nice acidity. All of our white varietals, and roughly 90% of our red varietals, had been harvested before the October fires.

**2018:** With ideal conditions during flowering and a cooler, dry year, yields were up and the quality superb. The large crop set resulted in our team making multiple thinning passes of the fruit leaving only that of the highest quality. Due to mild temperatures, harvest started two weeks later than in 2017. With only one rain event at the beginning of October and clear skies from then on, the fruit was able to have a long hang time to reach textbook maturity.
